

Doyle's Dialogue

Theme: Dinosaurs

Date: May 17th - 21st

The K2 Preview

To conclude our Social Studies and Science exploration, the Kindergarteners were able to choose their own topic of interest. Together, they decided that the "land before time" should be our destination. We will explore the different types of animals, along with their diets and physical attributes. I'm sure there will be lots of opportunities for fun crafts along the way!

Language Arts: review all word family and sight words to date; dinosaur book with visiting author illustration methods

Math: writing numerals to 125, counting quarters with mixed coins, identifying ratios with probability, writing a word problem to match a number sentence, number patterns, identifying quantity using place value to hundreds, identify three-dimensional shapes

Science: dinosaurs, diets, attributes, extinction

Practice at Home

All homework is due on Friday.

No baggie books this week.

For language, your child will write the noun to finish the sentence. A second sheet is attached in which they will identify the sentences as facts or opinions.

In math, your child will complete number sentences including three addends. Then, they will identify the answer as even or odd. The second activity requires your child to complete a chart showing how many inches Ursula grew each month. Then, they must answer questions by reading the graph.

Doyle's Details

May 26th - Field Day. School dismissal at noon.

May 26th - Pool Party at 5:30.

May 27th - Awards Day 10:30. Special presentation for our class immediately after in the Media Center. School dismissal at noon.

Holiday Camp is available both days.

Jonathan Miller, a visiting author, shared his story about Sammy the wonder dachshund. We loved seeing his illustrations and look forward to trying out his technique this week.
